DETAILED ACTION

Allowable Subject Matter

1. Claims 26-28 and 41-46 allowed.
- 2.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 24 and 25 rejected under 35 U.S.C. 103(a) as being unpatentable over Chiang et al. (4,598,305) in view of Gardner et al. (6,027,978)

Regarding Claims 24 and 25, Chiang et al. disclose a depletion mode thin film semiconductor photodetectors where in Figs. 1 and 7, it is disclosed a depletion mode thin film transistor 10 with source electrode 30, drain electrode 32, gate electrode 22, two layers of channel region 16 and 14 that have n doped upper layer and p doped lower layer and gate oxide dielectric layer that separates gate electrode 22 from the channel regions 16 and 14. Chiang et al. fail to disclose the required channel portions with different doping to control the threshold voltage. However, Gardner et al. disclose a method of making an IGFET with a non-uniform lateral doping profile in the channel region where in claims 17, 32 and 36 channel portions with different doping to aid the threshold voltage control are disclosed.

Art Unit: 2826

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required differently doped channel portions in order to have a threshold voltage control in Chiang et al. as taught by Gardner et al. in order to have a thin film semiconductor device with increased performance and flexibility.
